What it means for portfolios

Half time check in

U.S. markets have steadily gained following announcements of a ceasefire in the Middle East. Small companies have outperformed as the U.S. economy remains strong.

Source: Bloomberg, data as of 6/30/2026. All return figures are rounded. U.S. stocks are represented by the S&P 500 Index from 3/4/57, International Equity represented by MSCI ACWI Index, Bonds represented by Bloomberg US Agg Bond index, small caps represented by the Russell 2000, international bonds represented by the Bloomberg Global Agg Bond Index, cash represented by the Bloomberg 0-3-month Treasury Bill Index. **Index performance is for illustrative purposes only. Index performance does not reflect any management fees, or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.** 2: Bloomberg, as of 6/30/2026.

Consumer sentiment at all-time lows

Sentiment has fallen to record lows, driven by a combination of war, elevated oil prices, and an unprecedented gap in sentiment between political parties. Historically, low sentiment has been a strong bullish signal for equities.

Consumer sentiment hit an all-time low in May driven by the largest divide in sentiment by party

U.S. stock one-year returns following historic low points in consumer sentiment

Source: Bloomberg and the University of Michigan, data as of 6/30/26. Left: Consumer confidence and inflation expectations represented by the University of Michigan surveys, as of 6/30/2026. U.S. stocks represented by the S&P 500 TR Index. Left side chart depicts overall consumer sentiment index figure. Consumer sentiment by political party is not depicted in the chart. One year return periods represented by the local low points in sentiment indicated on the left side chart. "Sentiment <60%" column represented by average one-year returns following months with a consumer sentiment lower than 60. Index performance does not reflect any management fees or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.

Dispersion among tech companies

It's not a simple tech sector story. Companies across the tech universe have deviated in performance, with AI stocks still seeing strong returns while software stocks have dropped in value.

Total cumulative return (%) 6/30/2025-12/31/2025 (Left) vs 12/31/2025-6/24/2026 (Right)

Looking ahead

1

AI may continue to lead markets

Markets continue to benefit from easing geopolitical tensions, accelerating AI investment, and persistent hardware shortages.

We remain constructive on AI equities as a key driver of U.S. earnings growth.

2

Diversify portfolios to weather volatility

Strong rallies have often been accompanied by periods of elevated volatility. Consider diversifying portfolios to help navigate short-term market swings.

Buffer strategies may help reduce downside risk, while alternatives can provide additional sources of return and diversification.

3

Opportunities in Fixed Income with a hawkish Fed

Bond yields have risen as the U.S. economy has remained strong and the Federal Reserve has indicated that interest rates may stay higher for longer.

Even so, today's higher yields continue to create attractive income opportunities for bond investors.

There is always a reason to sell

Market pullbacks, corrections and bear markets over the last 17 years happen more than most realize. Don't panic over heightened geopolitical tension as markets persist over the medium to long-term.

Stock market volatility proves, like always, to be unpredictable

Stock market volatility has been mild even with all the geopolitical uncertainty.

S&P 500 SINGLE-DAY SWINGS OF +/-2% OR MORE

NUMBER OF SINGLE DAY SWINGS (1/1/2001 - 3/31/2026)

What volatility tells us about potential returns

Average return during +/- 2% trading days in calendar years, 1/1/2001 - 3/31/2026

Source: Morningstar as of 3/31/26. U.S. stocks represented by the S&P 500 Index. Single day swings are measured by full day returns for each respective trading day. Past performance does not guarantee or indicate future results. Index performance is for illustrative purposes only. You cannot invest directly in the index.

Utilizing diversified funds can reduce risk

A rising stock market can mask the risks of individual stocks, which is why diversified stock mutual funds and ETFs play an important risk-management role.

Over the past 3 years, losses have been rare among stock mutual funds and ETFs—but nearly half of individual stocks declined

Across multiple time periods, funds have limited losses compared with individual stocks

	Individual U.S. stocks	U.S. stock mutual funds & ETFs
Lost money over 1 year	51.0% 1862 out of 3651	4.7% 119 out of 2558
Lost money over 3 years	42.2% 1437 out of 3408	0.1% 2 out of 2319
Lost money over 5 years	43.7% 1282 out of 2933	2.8% 59 out of 2120
Lost money over 10 years	28.7% 680 out of 2371	0.0% 0 out of 1723

Higher yields enhance income opportunities

Strong U.S. economic data and elevated inflation drove a sharp Treasury selloff and pushed yields to multi-decade highs. While equities have continued to advance, yields for bonds have become increasingly attractive.

Yields rise, creating strong opportunities for income in a portfolio
